

Management for Safety

Regional Workshop on the development and implementation of effective IMS based on GSR Part 2

Jakarta, Indonesia 31 July-04 August 2023

Regulatory Activities Section Division of Nuclear Installation Safety (NSNI) International Atomic Energy Agency (IAEA) Department of Nuclear Safety & Security

Learning objectives

This lecture aims to introduce the responsibilities of the regulatory body senior management in management for safety.

Content

- 1. Introduction
- 2. Main Requirements
- 3. Management responsibilities
- 4. Goals, strategies, plans and objectives to meet the safety policy
- 5. Interested Parties
- 6. Key Messages

1. Introduction

- Management for safety is focussed on the regulatory body senior management responsibility to:
 - Establish, apply and sustain and continually improve the regulatory body management system for safety and foster culture for safety;
 - Ensure that the regulatory body's goals, strategies, plans and objectives developed do not compromise safety by other priorities, and;
 - Promote the interaction and communication between regulators and Interested Parties.
- The effectiveness of a management system begins with senior management
